ABOUT

Name: Boris Syrpin

Age: 24

Ready for relocation: Yes (Europe, UAE, Asia, America)

Ready for for in office: Yes

Experience: 6+ years

Software Engineer (Frontend) with 6+ years of experience in designing, developing, and deploying scalable web applications in cloud environments.

Proven ability to deliver commercially-driven projects from concept to production. Skilled in collaborating with cross-functional teams and explaining complex technical concepts to non-technical stakeholders. Passionate about innovation and implementing cutting-edge frontend solutions to create business value.

Ready to relocate (Europe, UAE, Asia, America) or work on-site.

SKILLS

Frontend:

React, Typescript, Javascript ES7+

Deep and complex app optimization (WRYD, Lighthouse, caching, etc)

Next.js, custom SSR

Node.js, custom Webpack

Storybook

Microfrontends, monorepos

Other:

Docker

K8S

CI/CD

Linux

Backed:

Microservices

Kafka

Go

Java + Spring

Tracing, logging, ELK

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer (2024–2025)

Mayflower

On-site, Cyprus, Limassol

- Developed complex business logic from scratch without external libraries (e.g., live thumbnails, lazy-loading).
- Built scalable React components and supported a custom SSR kernel.
- Optimized frontend to handle 50K RPS.
- Integrated Sentry, Kibana, and AWS services for infrastructure monitoring and issue tracking.
- Added new components to Storybook and the codebase.
- Created custom ESLint rules to enforce code conventions and prevent the use of specific components/functions.
- Worked extensively with Redis caching and WebSockets.

Key achievements:

- Designed and implemented a robust error-handling system across the project, including linter rules, logging, and tracing.
- Fully refactored the translation system and introduced a more efficient solution

Senior Software Engineer (2022–2024)

Kladana (Moysklad)

Remote, Kazakhstan, Almaty

- Supported a microfrontend kernel and developed new modules.
- Built microfrontends from scratch and optimized code (WDYR, Lighthouse).
- Conducted technical interviews and led developer meetups.
- Supported Java EE code and integrated gRPC.
- Created reusable React components and integrated libraries like react-query.
- Designed and deployed a CI/CD pipeline for the Indian production environment.

Key achievements:

- Gained deep expertise in microfrontend architecture.
- Organized and led three meetups on frontend technologies (e.g., testing strategies).

Frontend Engineer (2021–2022)

Sberauto

Remote, Russia, Moscow

- Built custom multi-step wizards and forms using react-hook-form.
- Worked closely with WebSockets and Centrifugo for real-time updates.
- Developed with Next.js and contributed new React components.

Frontend Engineer (2020-2021)

Anatomia Sna (e-commerce)

Remote, Russia, Moscow

- Migrated the entire site from jQuery to Next.js, improving maintainability and performance.
- Created new React components and refactored the billing system.
- Launched an internal side project — a news aggregator — from scratch.

Key achievements:

- Improved SEO, moving the site from the second page of Google to top positions.
